

# HYTEP

CZECH HYDROGEN  
TECHNOLOGY PLATFORM

— SINCE 2007 —

[www.hytep.cz](http://www.hytep.cz)

## HYTEP is platform encompassing

commercial, scientific, research and educational entities active in the field of advanced hydrogen and related technologies. Platform formation was initiated in 2007 by the Ministry of Industry and Trade of the Czech Republic.

## HYTEP defines, represents and defends

common interests of its members in order to create a suitable environment for the application of modern technologies which help to tackle the burden of climate change.

## HYTEP supports effective cooperation

when dealing with research, development and innovation projects, as well as commercial activities when developing hydrogen technologies in various sectors of hydrogen economy.

## HYTEP organizes international conferences

about hydrogen technologies in Central Europe. Each year HYTEP organises Central European conference called Hydrogen Days.

## HYTEP enables involvement

of its members in national and European policy making regarding the development of hydrogen economy with the aim to increase competitiveness of the Czech Republic.

## HYTEP is association open to other partners

that are actively engaged or wish to develop innovative hydrogen technologies or hydrogen projects in the Czech Republic.
